

Omron NZ welcomes its latest business partner: Dalton Electrical

Omron NZ has proudly signed its second Accredited System Integrator in New Zealand – Dalton Electrical Ltd.

Established in 1966, Dalton Electrical are a specialist industrial electrical contractor, working on everything from automation projects, machinery breakdowns to planned maintenance.

They are proud members of Master Electricians NZ.

Their automation expertise has been recognised by winning the Master Electricians Excellence award for automation twice and being national finalists for the same award on three occasions.

Dalton Electrical “are focused on providing excellent service and maintaining customers for life.”

SYSTEM INTEGRATORS

“Dalton Electrical have always had a strong relationship with Omron NZ,” says Thomas Fuscic, Automation Manager.

“Relying on their rapid afterhours response and technical assistance has helped us keep our clients running 24/7, he says.

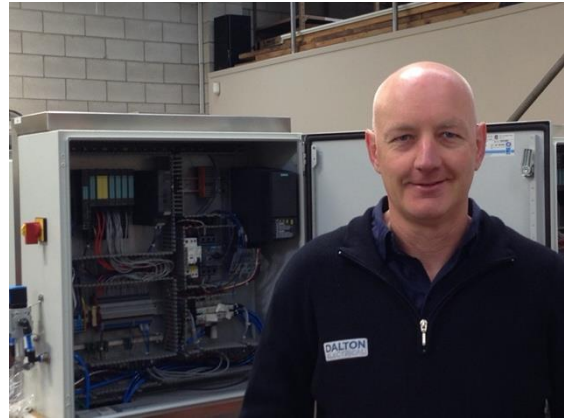

“We have successfully installed Omron solutions in projects where a wide range of hardware is required. It’s a huge plus that everything including Relay’s, PLC’s, HMI’s, safety and motion systems are readily available and locally stocked.”

Omron Electronics partners with approved system integration companies throughout New Zealand, who install Omron Electronics' products into end users' facilities and OEMs Machinery.

Through this Accredited System Integrator Program clients can expect first-class service and on-going expert support.

"We guide the system integrators during installation and assist with problem resolution should any issues arise pre or post-installation," says Omron NZ Country Manager, Lyndon Fowler.

"We also provide training to System Integrators to ensure a high level of technical expertise is maintained.

Managing Director Bruce Dalton

"We look forward to a long and successful partnership with the Dalton Electrical team."
